PROJECTS

Front End Web Developer, HŌM — Live Deployment | Github Source

A polygot web-app providing a 'Tinder-esque' browsing experience for rentals, tracking interest and disinterest.
- Integrated a React / ERB frontend with a REST Rails Backed using ReactOnRails gem.
- Implemented responsive front-end design with Javascript, jQuery, CSS.
- Styled Google Maps API integration to match site design.

Full Stack Web Developer, Mikey's Fancy Restaurant — Live Deployment | Github Source

Tool for adding and rating recipies, generating a menu of the most popular from four food categories.
- Ruby on Rails app, controllers, models, migrations, and views written without generators.
- Styled components with the Semantic UI CSS/Javascript libraries.
- Wrote dynamic handling for adding as many ingredients a user would like to add.
- Created home-page that automatically creates a weekly menu from the most popular dishes in 4 dish categories.

EXPERIENCE

Web Designer / Community Consultant, Contractor — February 2009 – January 2016
- Built and deployed client websites with low cost and easy to understand maintenance tools.
- Implemented successful and efficient social media plans, educating professionals on how to interface with their community and maintain relationships with clients, customers, and leads.
- Mentored professionals in effective personal and professional uses of digital communication platforms.
- Created and assembled media for strategic distribution on web and in print.
- Distributed client business information across place data platforms such as Google Places, Foursquare, Yelp, etc.

Community Manager, Social Fluency — June 2013 – February 2014
- Updated and maintained the socialfluency.com wordpress website, using HTML and CSS.
- Booked location, arranged food and drink specials, secured door prizes from affiliates, and independently designed and executed social and print marketing campaign for "Fluency Friday: A Networking Social and Happy Hour" with an attendance between 150 and 200 people, all on zero budget.
- Created 80% of inbound leads with open events and content curation across Facebook, Twitter, and Linkedin.
- Redesigned business documents (brochures, forms, invoices) improving workflow speed and brand recognition.
- Improved company productivity by introducing new tools to production and project management.

Web Designer / Email Engagement, RelayRides.com — November 2012 – February 2013
- Produced 90% of client facing email in HTML and CSS, utilizing Bronto email marketing platform.
- Built cohesive relationships with customers by curating compelling content for email newsletter.
- Increased speed of email newsletter production 70% with new processes.
